

Amending the Columns for displaying competitors' information on Sailwave

Use these instructions to amend the columns of information displayed on Sailwave Results about the competitors eg Helm name, Crew name, Club etc for a particular event or series.

1. Open the sailwave file for the event that you are checking
2. Click on the button along the top labelled 'columns'

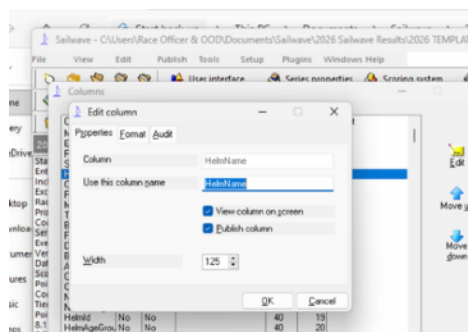

3. The pop up box which appears will list the available columns of information for the competitors in the event. The column headed 'View' indicates if these are included on the main sailwave file used for entering race results. The column headed 'Publish' indicates if these are included on the published results for printing or uploading to the website

Click here to edit the settings for the highlighted column

Use arrows to change the order in which the highlighted column is displayed

4. To edit the settings for a column use the pop up box which appears when you click on the edit icon. Edit the fields as required for the column heading name, visibility and width of display.

5. Press OK and repeat to edit any other columns as needed. Remember to save the Sailwave file to save your changes.
